

Annex III

Table 1: Shared motherhood and legal parenthood scenario tables for female same-sex married couples or couples in civil partnerships

Scenario	Treatment		Registration	Consent to posthumous use	Posthumous birth registration
	Egg provider's consent to treatment	Legal parenthood		Does the egg provider wish her partner to be able to use the eggs or embryos in her own treatment in the event of her (the egg provider's) death, and be registered as the legal parent?	Does the partner not receiving treatment wish to be registered as the legal parent of any child born if she dies before embryos (that were created before her death) are used?
The egg provider is seeking treatment using embryos created with her eggs and donor sperm. She will be the birth mother. Her spouse/civil partner will be the legal parent of the resulting child.	The egg provider completes the WT form.	N/A	The egg provider is registered as patient, the partner is registered as partner.	The egg provider completes the WPT form (specifically section 6) and the PBR form.	The egg provider's partner (not receiving treatment) completes the PBR form.
The egg provider is providing eggs for use in her spouse/civil partner's treatment. Donor sperm is used. Her partner will be the egg recipient and the birth mother.	The egg provider completes the WPT form.	N/A	The egg provider is given a registration which encompasses both patient (i.e. for egg collection) and partner. The egg recipient (who will be the birth mother) is registered as patient.	The egg provider completes the WPT form (specifically section 6) and the PBR form.	The egg provider (not receiving treatment) completes the PBR form.
The egg provider had originally consented to creating embryos for her own treatment but now wishes her partner to use these embryos created with her eggs.	The egg provider completes the WPT form which will supersede any previously completed treatment form (e.g. WT form).	N/A	The egg provider will also be registered as 'partner'. The egg recipient (who will be the birth mother) will also be registered as 'patient'.	The egg provider completes the WPT form (specifically section 6) and the PBR form.	The egg provider (not receiving treatment) completes the PBR form.
The egg provider had originally consented to creating embryos for use in her partner's treatment but now wishes to use them herself.	The egg provider completes the WT form which will supersede any previously completed treatment form (e.g. WPT form).	N/A	The egg provider will already be registered as a 'patient' so no change is needed.	The egg provider completes the WPT form (specifically section 6) and the PBR form.	The egg provider's partner (not receiving treatment) completes the PBR form.

			The partner (who was originally registered as the 'patient') will also be registered as a 'partner.'
